TO: Lois Rossi PM(21)
Insecticide/Fungicide Branch
Registration Division TS-767C

The registrant, Rohm and Haas Company has submitted additional information on the fish early life stage test previously reviewed by EEB, see review dated July 31, 1987. In that review, EEB indicated that additional information was necessary before the test evaluation could be completed. The test was categorized as supplemental because of the missing information. All but one of the noted deficiencies have been adequately addressed, see attached excerpt from the submission in which ABC Laboratories satisfactorily addresses each protocol question. The deficiency which the registrant failed to address was the submission of all required raw data. In the final response (Page 8 of 72, attached excerpt) it indicates that raw mortality data are provided on pages 38 to 45. In the copies of raw data provided with the submission, the registrant provided pages 38, 39, and 45, omitting pages 40, 41, 42, 43, and 44. The EEB notes that other raw data previously required have been provided including:

1. number of embryos hatched;
2. time to hatch; and
3. measurement of length and weight.

Conclusion

When the required mortality data for days 11 through 26 of the study have been provided, EEB will complete its reevaluation of the study.
